# **Special Issue**

# Modelling of Plasma Flow

## Message from the Guest Editors

The aim of this Special Issue is to collect a wide variety of papers which have as their unifying theme the modelling of plasma flows and of their associated instabilities or turbulence, as well as the use of analytical tools for the description of plasma processes that can be of interest to the physics of classical fluids. In order to grant accessibility to a wide audience, we intend to place a strong emphasis on the pedagogical presentation of subjects which may be relevant to the physics of laser plasma interaction, of magnetically confined plasmas fusion and astrophysical plasmas.

### Keywords

- fluid and kinetic modelling in plasmas
- plasma turbulence
- laser-plasma interaction
- magnetized plasmas

# **About the Journal**

## Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in Fluids. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider Fluids as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

### Editor-in-Chief

Prof. Dr. D. Andrew S. Rees

Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

CiteScore - Q2 (Mechanical Engineering)
