

## Special Issue

# Recent Advances in Impinging Jets

### Message from the Guest Editor

Impinging jets are commonly used in many different industrial applications for the cooling of electronics or turbine blades as well as for drying textile or paper and for metal cutting, amongst others. Despite decades of research, the complex flow behavior of impinging jets is still not completely understood. However, the development of increasingly advanced numerical and experimental tools has opened up new possibilities in understanding these flows. The field of impinging jets is a broad one and this special issue invites authors to submit research that focusses on the detailed flow behavior and its effect on mass and heat transfer in impinging jet applications. Both numerical and experimental studies are invited, including flow manipulation/control techniques that may lead to performance enhancement.

### Guest Editor

Dr. Rene Van Hout

Faculty of Mechanical Engineering, Technion - Israel Institute of Technology, Haifa 32000, Israel

### Deadline for manuscript submissions

closed (15 June 2021)

## About the Journal

### Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
