

Special Issue

Classical and Modern Topics in Fluid Dynamics and Transport Phenomena

Message from the Guest Editors

This Special Issue of *Fluids* focuses on selected topics of classical as well as modern problems in fluid dynamics and transport phenomena. Modern topics such as nanofluids, bio-transport phenomena, bio-fluids, and cooling of microelectronics combine with classical topics such as thermal convection where modern modelling and solution techniques are applied to solve a still incompletely understood phenomenon. Alternatively, classical methods are applied to solve new and undocumented fluid dynamics problems such as bounded flows. The variety of the selected topics have one common factor—they are all original contributions or state-of-the-art reviews to fluid dynamics.

Guest Editors

Prof. Dr. Florinda Capone

Department of Mathematics and Applications "Renato Caccioppoli",
University of Naples Federico II, Via Cinzia, 80126 Naples, Italy

Prof. Dr. Peter Vadasz

Department of Mechanical Engineering, Northern Arizona University,
Flagstaff, AZ 86001, USA

Deadline for manuscript submissions

closed (31 October 2020)

About the Journal

Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

Editor-in-Chief

Prof. Dr. D. Andrew S. Rees

Department of Mechanical Engineering, University of Bath, Bath BA2 7AY, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
