

# Special Issue

## Trends in Spray Atomization

### Message from the Guest Editors

Spray technology and concepts are encountered in our day-by-day lives, from advanced propulsion systems to human respiratory emissions. This special issue covers the state-of-the-art developments in various spray atomization aspects focused on coating, combustion, powder formulation, and respiratory events-with a special emphasis on the latter. New atomization techniques, characterization means, and novel liquid breakup concepts to unravel pathogen carrier droplet transmission routes, in the face of Covid-19 pandemic, are highly encouraged.

## About the Journal

### Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Mechanical Engineering)
