Deadline for manuscript
submissions:

closed (20 March 2024)

Message from the Guest Editors

Dear Colleagues,

Food safety is of great significance to the social economy and stability in the lives of individuals. In food science and technology, one of the most important challenges is the authentication of processed food and food supplements.

In this Special Issue, we encourage submissions of review or research manuscripts related to the authentication of processed food and food supplements in the areas of food science and food safety, such as DNA extraction from food samples, molecular markers, food authenticity tests, PCR-based technology and transgenic food product tests. We are highly interested in and encourage manuscripts related to new techniques in this field for food safety, such as biosensors, DNA chips, high-throughput sequencing, etc.

Dr. Junfeng Xu

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
