Message from the Guest Editor

Dear Colleagues,

The generation of byproducts is ubiquitous in the food and dairy industry. Instead of landfilling these materials, innovative and emerging technologies can turn them into value-added products such as fine chemicals, micronutrients, ingredients, and additives. Expanding the utilization of by-product streams is multidisciplinary in nature since it involves the application of chemical and physical methods to create a desirable modification. Over the past few years, creative combinations of different technologies have shown some promises for expanding the utilization of byproduct streams. In this Special Issue, you are invited to submit original research, review articles, and opinions on the broad area of innovative technologies for the utilization of byproducts.

Dr. Sergio Martinez Monteagudo

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.**

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
