Food Proteins and Bioactive Peptides: Novel Sources, Characteristic and Application

Guest Editors:

Dr. Thao Le

Department of Food Science and Microbiology, Auckland University of Technology, Auckland, New Zealand

Prof. Dr. Hilton Deeth

School of Agriculture and Food Sciences, The University of Queensland, Brisbane, QLD 4072, Australia

Deadline for manuscript submissions:

closed (10 May 2024)

Message from the Guest Editors

Protein is an important nutrient in the body's growth and biological functions for which the bioactive peptides derived from the protein often possess higher bioactivity, e.g., antioxidant, antihypertensive, anti-cancer, anti-inflammatory, than the parent protein. Protein also plays a critical role in maintaining the functional properties of food products e.g., emulsifying, foaming, and water-binding. Traditionally, proteins originated from animal sources such as meat, poultry, fish, eggs and milk have been the main proteins in human diets. This trend has shifted towards plant-based proteins which have emerged as an acceptable alternative protein source for human consumption. This Special Issue is to highlight novel protein sources on the market as well as approaches to improve the properties and nutritional qualities such as digestibility and bioactivity of the present and new protein sources. Also, combining plant and animal proteins has potential to be a future protein consumption trend. In addition, challenges occurring in plant protein production and utilisation of plant protein in food applications are expected to be addressed in this Special Issue.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
