Message from the Guest Editors

Billions of people around the world are poorly nourished, millions of farmers must live at a subsistence level, enormous amounts of food go to waste, and poor farming practices are endangering agroecosystems, especially when growing for quantity rather than quality, when it comes to agriculture and food systems. The rising rates of non-communicable diseases (obesity, diabetes), and the persistence of hunger in many parts of the world are also a dramatic part of the problem. The future of agriculture in this changing climate and global warming trend will have severe impacts on water supply, soil quality, and the future of food production. The achievement of the United Nations Sustainable Development Goals will require the adaptation of food systems to be more inclusive, sustainable, efficient, and nourishing. This situation calls for advances and critical discussions and investigations on interconnected areas of research, development, and innovation, when it comes to the security or the insecurity of foods for the future.

Visiting Professor, Faculty of
Clinical Sciences and Nutrition,
University of Chester, Chester, UK

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [AGRICOLA](#), and many [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2020).
