Current Research on Contamination Detection and Quality Assessment Based on GC-MS and HPLC-MS in Foods

Guest Editor:

Prof. Dr. Evaristo Ballesteros

Department of Physical and
Analytical Chemistry, E.P.S of
Linares, University of Jaén, 23700
Jaén, Spain

Deadline for manuscript
submissions:

closed (31 October 2024)

Message from the Guest Editor

In recent years, endocrine disruptors have sparked increasing interest on account of their highly adverse effects on human health and, especially, their ability to induce infertility and cancer. In addition, these contaminants are often present in food packaging plastics and other materials, from which they can migrate into food and water. Regulatory bodies are increasingly concerned with their control, which requires using methods capable of detecting them with high sensitivity, accuracy, and precision. Two additional problems in developing such methods arise from the complexity of food matrices and the fact that endocrine disruptors are usually present at exceptionally low, trace levels in foods. This requires using effective sample treatments to reduce matrix effects and preconcentrate the analytes.

The aim of this Special Issue of Foods is to disseminate novel methods for determining endocrine disruptors and other contaminants potentially present in food, with special emphasis on effective extraction procedures and quantitation with gas chromatography and liquid chromatography coupled to mass spectrometry. Both original research and review articles are welcome.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
