Deadline for manuscript submissions:

**closed (23 October 2024)**

### Message from the Guest Editors

Dear Colleagues,

Tea processing techniques have received increasing attention as an important way to improve tea quality. Different technologies applied in tea processing could create sensorial profile diversities of tea products. Special flavors are the source of tea's charm, and flavor chemistry is the origin of tea's sensorial qualities. Plentiful aroma, characteristic tastes and various colors are the foundation of tea's flavor qualities. Due to the processing techniques having significant effect on the tea flavor qualities, recent advances refer to new forms of application to explore the causes of tea flavor formation under different processing techniques. Tea has been proved to be a healthy beverage, and processing techniques also have great effect on tea's chemical composition, which are the basis of its health benefits. So, the internal factors of tea flavor changes and health benefits caused by tea processing techniques need intensive study.

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN 47907, USA

2. Department of Comparative  
Pathobiology, Purdue University,  
West Lafayette, IN 47907, USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
