## Maillard Reaction: New Knowledge in Process Contaminants in Foods and Effects on Biological Systems

Guest Editors:

**Dr. Marta Mesias**

Characterization, Quality and Safety Department, Institute of Food Science, Technology and Nutrition, ICTAN-CSIC, José Antonio Novais 6, 28040 Madrid, Spain

**Dr. Cristina Delgado-Andrade**

Estación Experimental del Zaidín (EEZ), Spanish National Research Council (CSIC), Granada, Spain

**Dr. Francisco J. Morales**

Institute of Food Science, Technology and Nutrition (ICTAN), Spanish National Research Council (CSIC), Madrid, Spain

Deadline for manuscript submissions:

**closed (20 July 2021)**

### Message from the Guest Editors

The formation of chemical contaminants associated with the development of the Maillard reaction during food processing has aroused great interest in recent decades, being the object of study of numerous investigations. Despite the advances, many tasks remain to be done concerning the food matrix effects on the formation of Maillard-derived compounds and mitigation strategies, their metabolism and biotransformation, the elucidation of the chemical structures of many of them, and the relationship with specific toxicological actions or the development of reliable and standardized chromatographic methods for analysis in foods that allow estimation of the exposure through diet and its associated risk.

This Special Issue is open to contributions aimed at exploring recent advances on these chemical process contaminants in foods. The Issue's scope includes novel insights into their chemistry of formation and elimination, effective mitigation strategies, new analytical techniques, the risk/benefit approach, and exposure assessment, in order to enhance our understanding of these compounds and their dietary exposure.

## Editor-in-Chief

### **Prof. Dr. Arun K. Bhunia**

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN, USA

2. Department of Comparative  
Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
