### Message from the Guest Editors

Dear Colleagues,

Starch is primarily used as a key food for sustainable energy, yet advancements in technology have shown starch as a viable ingredient for other industries. Therefore, understanding the physicochemical properties and roles of starch across industries is critical as processing needs, analytical methods, and existing applications evolve. This Special Issue will highlight the advancements in starch production and its effect on foods, new techniques to characterize starches in foods and other commodities, and opportunities for novel starch applications across industries.
