## Proteomics and Food Analysis: Principles, Techniques, and Applications

Guest Editor:

**Dr. Mónica Carrera**

Department of Food Technology,  
Spanish National Research  
Council (CSIC), Marine Research  
Institute (IIM), 36208 Vigo, Spain

Deadline for manuscript  
submissions:  
**closed (20 March 2021)**

### Message from the Guest Editor

The recent successes of proteomics methodologies make them a favorable strategy for food science studies. In this Special Issue, we will look at the latest advances in techniques and applications of proteomics in food analysis. The latest advances in bottom-up proteomics techniques, shotgun proteomics, top-down proteomics, targeted proteomics, modoficomics, data-dependent acquisition (DDA), data-independent acquisition (DIA) strategies, and protein-chips/biosensors applied to food analysis are included in this Special Issue. Thus, the power of these methodologies allows the food characterization, food authenticity, identification of quality markers, detection of food allergens, food microorganism detection, detection of food parasites, food processing analysis, identification and study of bioactive food compounds, bioinformatics analysis of food components and by-products, and the metabolic and systems biology study of food components from a nutritional or functional point of view, among others.

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN 47907, USA

2. Department of Comparative  
Pathobiology, Purdue University,  
West Lafayette, IN 47907, USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
