Message from the Guest Editors

The potential of high added-value ingredients spans a diverse range of applications allowing for the development of products with enhanced nutritional value, improved technological and physico-chemical features, increased shelf-life, as well as a good sensory profile. This paves the way for almost infinite upcycling strategies that we would like to collect in this Special Issue.

In this framework, we aim at collecting original research articles and reviews on this topic, ranging from method development and optimization to the investigation and exploitation of agro-food by-products for high value-added food production.

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
