Characterization of Bioactive Compounds in Foods and Plants Using Advanced Analytical Techniques

Guest Editors:

Dr. Marina Russo

Messina Institute of Technology
c/o Department of Chemical,
Biological, Pharmaceutical and
Environmental Sciences, Former
Veterinary School, University of
Messina, Messina, Italy

Prof. Dr. Francesco Cacciola

Department of Chemical,
Biological, Pharmaceutical and
Environmental Sciences,
University of Messina, Messina,
Italy

Deadline for manuscript
submissions:

closed (10 June 2021)

Message from the Guest Editors

Since the 1990s, food chemistry has opened a new chapter in foods and plants investigation. Increasing attention to secondary metabolites and micro-constituents of nutraceutical interest present in foods has been noticed, supporting previous studies on macronutrient composition. Thanks to positive scientific opinions on the presence of bioactive molecules in plants and foods, the previous vision of foods exclusively from a “caloric” point of view has been changed looking at foodstuffs as having positive effects on human health.

This Special Issue focuses on the optimization and validation of advanced analytical methodologies dedicated to the characterization and valorisation of foods and plants containing bioactive molecules. Quantitative characterization, food security, traceability, innovation in the field of nutraceutical and functional nutrition will be of particular interest in order to stimulate a dialogue on correct nutrition concept in a cultural, technological and climate context in constant change.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.**

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
