# Edible Insects as Innovative Foods: Nutritional, Functional and Acceptability Assessments

Guest Editors:

#### Prof. Dr. Chuleui Jung

School of Bioresource Sciences, Andong National University, Andong 760-749, Republic of Korea

#### Prof. Dr. Victor Benno Meyer-Rochow

Department of Ecology and Genetics, Oulu University, 90140 Oulu, Finland

Deadline for manuscript submissions:

closed (30 May 2020)

## **Message from the Guest Editors**

Will insects be the food of the future?

The answer is that we aren't sure yet, but what we are certain of is that insects in the past were indeed a food item appreciated by humankind worldwide. Various edible insect species have had their farming potential assessed, their acceptability as a novelty food (or feed in animal husbandry and fish culture) examined and their potential risk of carrying diseases or undesired microbes scrutinized.

We now possess a considerable amount of information on the kinds of insect that serve as food to various people in the world; we know that most insects are nutritious, consist of valuable protein, easily digestible fatty acids, and contain important minerals and vitamins, and recommendations exist regarding how to breed the most lucrative species optimally. However, there are still gaps to be filled with regard to the processing of cultured insects, the preparation and conservation of insect-based foods, economics and marketing, and the potential of insects as suppliers of health-promoting drugs and medicines.

## Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
