## Advances in the Quality of the Food Supply Chain for Bakery Products

Guest Editor:

**Dr. Angelo Maria Giuffrè**

Department of Agriculture,  
University Mediterranea of  
Reggio Calabria, 89122 Reggio  
Calabria, Italy

Deadline for manuscript  
submissions:  
**closed (12 March 2023)**

### Message from the Guest Editor

Bakery products are one of the largest sectors of the food industry and their interest continues to increase globally. The food market is mainly segmented into sweet baked goods and morning goods; bread rolls and loaves; rusks and breadsticks; and leavened as well as savory products. Bakery products are today prepared considering the nutritional, health and hedonic needs of consumers. This fact, combined with different local uses and technological needs, is therefore reflected in a wide variety of alternatives to the traditional recipe that are present globally for each type of bakery product. The potential topics of this Special Issue are related to the agronomic, microbiological, physicochemical, sensory, technological, labeling, analytical, safety and economic aspects that revolve around the concept of the quality of bakery goods. I sincerely invite high-quality original research as well as review papers on both experimental and theoretical works that address this topic.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.**

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
