Message from the Guest Editors

Currently, the global wine industry is transitioning from being producer-driven to becoming more consumer-centric. This Special Issue aims to present high-quality original research contributions, short communications and reviews on wine consumers' wine perception, preference and behaviour, including innovations in research methodologies.

It will cover all aspects of wine consumer research and potentially encompass topics such as sensory and molecular drivers of preference; contextual influences; wine consumer segmentation; and cross-cultural and inter-individual differences.

Research examining consumer acceptance of new wine products/styles plus topical issues, e.g., consumer attitudes toward wine provenance, authenticity, sustainability, ethical wine production and healthy lifestyles, are of interest.

Papers investigating digital technologies to collect and analyse wine consumer data will also be encouraged.
