Edible Oils in Food Science: Antioxidant Activity, Innovation and Applications, and Sustainable Use of By-Products

Message from the Guest Editors

In recent years, edible oils have garnered increasing attention for their potential applications across various scientific fields, including pharmaceuticals and cosmetics. This Special Issue aims to explore and evaluate new frontiers in food science, focusing on innovative applications of edible oils and their sustainable sourcing. Thanks to their composition and richness in bioactive compounds with potent antioxidant and antimicrobial properties, edible oils hold great potential for novel applications in biotechnology, pharmaceuticals, cosmetics, and agriculture. Additionally, their role in reducing waste through the sustainable utilization of by-products presents exciting avenues for research. This Special Issue seeks to gather interdisciplinary contributions that leverage advanced technologies to enhance the bioavailability of edible oils, facilitating their integration into circular economy models and eco-friendly solutions. We encourage original research and review articles focused on sustainability and innovation, highlighting the potential of edible oils in the food industry, pharmaceuticals, and cosmetics.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
