Green Extraction and Valorization of By-Products from Food Processing

Message from the Guest Editors

Food waste production covers the whole food life cycle, from agricultural to industrial production and processing, and then to retail and domestic consumption. Nowadays, industrial ecology concepts have been evaluated as leading principles for eco-innovation that targets the zero waste economy, where waste is used as raw material for new products and applications. Waste in large quantities generated by food industries causes serious problems both economically and environmentally, as well as causing a great loss of high-added value compounds. Moreover, most of these residues have reusable potential in other production systems. On the other hand, the extraction of natural products with green technologies is another contemporary issue based on the design of extraction processes that will reduce or eliminate energy consumption, as well as providing a safe extract with more quality. The main purposes of these technologies are to achieve better quality extracts with higher extraction efficiency while reducing extraction time, number of unit processes, energy and solvent consumption, environmental impact, economic costs and the amount of waste.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
