

Special Issue

Food Allergen Detection, Identification and Regulation

Message from the Guest Editors

Food allergies are a growing public health problem worldwide. For people with food allergies, the strict avoidance of allergic foods is the only way to protect themselves. Advanced analytical methods are required to ensure the safety of these individuals. These methods must be highly specific, sensitive, and resistant to interference from food matrix components. Current techniques focus on the detection of allergens themselves or relevant markers, such as peptide fragments or gene segments. The accurate detection and identification of allergens depend on the quality of the standards used. However, challenges such as a lack of availability, instability, the insufficient representativeness of allergens, or cross-reactivity with unrelated substances can complicate detection, so still require discussion. We are pleased to invite experts in the fields of food allergen analysis, food technology, food safety regulations, and related fields to contribute to this Special Issue of Foods. We look forward to original research articles, comprehensive reviews, and short communications that aim to advance our knowledge of food allergen detection, identification, labeling, and legal regulation.

Guest Editors

Prof. Dr. Dorota Piasecka-Kwiatkowska

Department of Food Biochemistry and Analysis, Faculty of Food Science and Technology, Poznań University of Life Sciences, Poznan, Poland

Prof. Dr. Piotr Minkiewicz

Department of Food Biochemistry, Faculty of Food Science, University of Warmia and Mazury in Olsztyn, 10-726 Olsztyn-Kortowo, Poland

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
