

Special Issue

Extraction of Bioactive Compounds in Food: Technologies, Challenges, and Perspectives

Message from the Guest Editors

In this Special Issue, entitled the "Extraction of Bioactive Compounds in Food: Technologies, Challenges, and Perspectives", we aim to advance knowledge on the recovery of bioactive food compounds by publishing review articles and innovative and groundbreaking research on this topic. Researchers are encouraged to address fundamental issues related to the use and application of these compounds, as well as the challenges they face in achieving their goal and their application perspectives in different industries. The main topics will include food sources for bioactive compounds, new green extraction methods, compound characterization, the elucidation of bioactive mechanisms, and the mention of the main challenges in the valorization of food compounds, alongside a constant focus on their applicability at the industrial level.

We hope that everyone will feel compelled to contribute to this collection to further understand and improve the diverse applications and bioactive properties of biowaste-recovered natural compounds for real-world applications in a wide range of industries.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
