

Special Issue

Food Policy, Strategy and Safety in the Middle East

Message from the Guest Editors

The Middle East encompasses countries characterized by distinct politico-economic dynamics that influence food systems differently across the Arabian Peninsula, the Levant, Turkey, Egypt, Iran, and Iraq. For most, the viability of the food systems to sustain the growing populations while ensuring a safe food supply is threatened by the overuse of groundwater, now compounded by the effects of climate change. Nevertheless, the factors shaping the region's ability to formulate and ensure the effective execution of relevant policies are subject to significant variations among the countries to tackle critical issues such as food security, foodborne disease prevention, water scarcity, and trade enhancement. The outcomes of these efforts hold immense significance for the social and health well-being of future generations. This Special Issue on "Food Policy, Strategy, and Safety in the Middle East" aims to present a comprehensive outlook on these crucial areas by gathering insights into current challenges, transformations in food systems, and the development or urgent implementation of policies to enhance food safety and security, and a glance into future directions.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
