

Special Issue

Research on Food Chemical Safety: 2nd Edition

Message from the Guest Editors

This Special Issue, “Research on Food Chemical Safety: 2nd Edition”, builds upon the success of the first edition and aims to further advance the state of the art in the detection, characterisation, risk assessment and management of chemical hazards in foods. This second edition places particular emphasis on realistic exposure scenarios and co-occurring contaminants. Topics of interest include, but are not limited to, the occurrence, formation and mitigation of pesticide residues, veterinary drugs, heavy metals, mycotoxins, processing contaminants, food contact materials and emerging contaminants. We especially encourage contributions addressing mixture toxicity and cumulative risk assessment—such as whole-mixture and component-based approaches, common assessment groups and metrics for combined exposure and risk—together with their toxicokinetic and toxicodynamic underpinnings.

We invite original research articles, reviews, case studies and perspectives that contribute to safer, high-quality and sustainable food products while minimising chemical risks for consumers in an increasingly interconnected world.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
