Quality Analysis and Control of Post-Harvest Fruits and Vegetables

Message from the Guest Editors

Currently, the main goal of the fruit and vegetable industry is to provide consumers with high-quality fruit and vegetables. In turn, the growing awareness of consumers regarding the benefits of eating fruit and vegetables and the analysis of product quality forces food producers to look for new methods to influence the quality of harvested fruit and vegetables. It is highly important to control how the quality of harvested agricultural products changes after harvesting during transport and storage to minimize losses.

In this Special Issue, we invite the submission of articles containing scientific research on the analysis and control of fruit and vegetable quality after harvesting and during transport and storage. Additionally, research on the impact of new technologies using abiotic and biotic factors on food quality and safety will be taken into account. The Special Issue focuses on the mechanical, chemical, and microbiological properties of fruits and vegetables. In addition, articles on improving the quality of tested raw materials during storage and processing will be considered.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
