

## Special Issue

# Food System Resiliency and Climate Change

### Message from the Guest Editor

The interplay between climate change and food systems has broad impacts on the future of the well-being of both people and the planet. Climate change affects crop yields, food production, and distribution, while food systems contribute to food security, greenhouse gas emissions, and environmental degradation. The ever-evolving costs of food systems and climate change affect the economy, health, society, environment, and policy. These effects have long-term implications for both developed and developing nations, as the economic and social stability of nations is greatly dependent on stable and resilient food systems. The extant body of literature primarily focuses on emissions and degradation related to different components of food systems. This Special Issue aims to open a different, but equally important, dialogue that examines the social cost of climate change in the context of food systems. We argue that this direction is critical even as individuals, governments, and NGOs work for climate-resilient strategies and policy adaptations.

### Guest Editor

Dr. Carolyn Dimitri

Nutrition and Food Studies, Food Studies, New York University, New York, NY 10003, USA

### Deadline for manuscript submissions

30 November 2025

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
