# Sensory Characteristics, Flavor Profiles, and Physical Properties of Foods

### Message from the Guest Editors

This Special Issue will focus on the sensory characteristics, flavor profiles, and physical properties of foods. Sensory study always plays an essential role in flavor research, and the special issue will discuss the new developments in sensory tests, including descriptive and consumer tests. Articles discussing the limitations of different sensory evaluation methods are welcomed. Meanwhile, the advanced analytical methods, applied to flavor analysis, will be discussed. Also, the application of biotechnology to understanding the mechanisms of flavor formation in fruit, vegetable or muscle products, and the effect of preservation and processing on food flavor and physical properties, will be included.
