Special Issue

Emerging Food Technologies and Novel Ingredients for Sustainable Innovation

Message from the Guest Editors

The growing global population and environmental challenges demand innovative approaches to food systems that foster sustainability and efficiency. This Special Issue focuses on emerging food technologies and novel ingredients that drive sustainable innovation. It highlights strategies in advanced processing technologies and alternative ingredients to enhance food quality, nutritional value, and resource efficiency. The topics of interest include innovative approaches utilizing plant-based proteins, insect-derived ingredients, single-cell proteins, and fractionated components from plant extracts or microalgae. These approaches contribute to reducing environmental impact, optimizing resource utilization, and addressing global food security challenges. We welcome submissions that investigate the potential of novel technologies to improve physicochemical properties, develop functional foods, and minimize waste in food systems. This Special Issue also encourages research on the application of cutting-edge technologies to enhance the functionality of new ingredients while maintaining environmental integrity.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

- 1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
- 2. Department of Comparative Pathobiology, Purdue University, West Lafavette. IN 47907. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
