# Special Issue

# Tea Chemistry, Flavor, and Aroma: Mechanisms, Sensory Attributes, and Processing Optimization

# Message from the Guest Editor

Tea (Camellia sinensis) is one of the most consumed beverages worldwide, renowned for its diverse flavors and aromas. These sensory qualities arise from the interaction between chemical composition of fresh leaves and biochemical transformations during processing. Understanding the mechanisms behind the formation of key flavor and aroma compounds is essential for advancing quality control and innovation in the tea industry. This Special Issue welcomes original research and reviews on the chemistry underlying tea's sensory attributes. Topics include the identification and quantification of flavor compounds-from volatile and non-volatile molecules (polyphenols, amino acids, sugars) to macromolecules—that define the taste and aroma of different teas. Studies linking instrumental analysis with sensory evaluation and clarifying the contribution of individual compounds to sensory perception are particularly encouraged. We also invite research on processing optimization, novel technologies, and the influence of cultivar or terroir, as well as metabolomic and analytical approaches that deepen understanding of tea chemistry from leaf to cup.

# **About the Journal**

# Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### **Editor-in-Chief**

### Prof. Dr. Arun K. Bhunia

- 1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
- 2. Department of Comparative Pathobiology, Purdue University, West Lafavette. IN 47907. USA

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
