Sustainability and Resilience in the Industrial Hemp Supply Chain

Message from the Guest Editors

The industrial hemp food and nutraceutical supply chain is increasingly recognized as a strategic model for sustainable and resilient development. Its multifunctional potential enables the valorization of multiple plant fractions, yielding nutrient-rich proteins, bioactive compounds, and functional materials for food formulations. Nevertheless, the sector still faces challenges related to regulatory harmonization, process optimization, and the need for robust scientific evidence to ensure safety, quality, and bioavailability.

This Special Issue is organized in connection with and in support of the conference “Sustainability and Resilience in the Industrial Hemp Supply Chain”, and focuses exclusively on food and nutraceutical applications within the industrial hemp supply chain. The objective is to gather experimental and theoretical research on novel processing technologies, characterization of hemp-derived nutrients and bioactives, and bioavailability and health effects, as well as strategies to enhance resilience and value creation in the hemp food and nutraceutical sectors.

Guest Editors

Prof. Dr. Severina Pacifico
Dr. Simona Piccolella
Dr. Luana Izzo

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
