New Advances in Extraction, Isolation and Characterization of Bioactive Compounds in Food

Message from the Guest Editors

Bioactive compounds exist in different forms such as flavonoids, co-enzymes, polyphenols and phytoestrogens, to name a few. Bioactive compounds in plant and animal sources are extremely important for human health as they provide extra nutrients required for the maintenance of human health. Recent research investigations combining structural chemistry, engineering, chromatography food processing and biophysics have provided novel ideas in terms of the extraction, isolation and characterisation of bioactive compounds from food sources. The arrival of 3D printing and advances in food valorisation have provided new angles in bioactive isolation and utilisation. This proposed Special Issue will focus on all aspects of the extraction, isolation and characterization of bioactive compounds incorporating research and reviews from leading researchers across the globe.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
