

Special Issue

Honeys and Bee Products: Physicochemical, Biological and Nutritive Properties

Message from the Guest Editors

Under the background of the Healthy China initiative, research on the exploration of natural food with nutrition and healthy function has become a hotspot in food science. Honey not only is favored by consumers due to its unique flavor but also possesses a wide use of pharmacological activities and biological functions as a natural dietary antioxidant. The key to revealing the honey–human health relationship is defining the physicochemical, biological and nutritional properties of honey and honey products. In this Special Issue of *Foods*, we would like to invite authors to submit original manuscripts within the scope of the proposed topics. Submissions of original research; reviews of current scientific literature, including systematic reviews and meta-analyses; and short reports are welcomed. We believe that this Special Issue, “Honeys and Bee Products: Physicochemical, Biological and Nutritive Properties”, will highlight the most recent advances in bioactive compounds and related analytical methods, nutritional values and biological functions.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
