

Special Issue

Sustainable Agriculture for Food and Nutrition Security: 2nd Edition

Message from the Guest Editors

The fundamental purpose of agriculture is to produce nutritious food for people. This production needs to be performed in such a way that it does not permanently degrade the environment or result in the loss of habitats for other organisms. These are challenging objectives.

As such, the aim of this Special Issue is to examine what 'sustainable agriculture' may look like in different parts of the world as the human population continues to increase, as climate changes become increasingly variable, and as the means to reduce greenhouse gas emissions are implemented. Different views and contributions about how sustainable production systems might emerge are welcome and may include aspects of regenerative, low-input, climate-smart, net-zero, intensified, mixed or conservation production systems. For this Special Issue, the 2nd Edition, articles that include data about the nutritional value of crops and animals to humans, in addition to details about production methods and yields, are particularly encouraged. We are also keen to explore how sustainable production systems can lead to a more efficient processing of products and thereby contribute to more sustainable food systems.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
