

Special Issue

Emerging Enzyme Engineering Techniques in Foods

Message from the Guest Editors

As the of the Special Issue "Emerging Enzyme Engineering Techniques in Foods" in *Foods* (ISSN 2304-8158, IF 4.350), I would like to invite you to contribute an original article or review paper focusing on innovative strategies for enzyme design and application in food systems. The development of engineered enzymes is opening new pathways to improve food processing efficiency, enhance product quality, and address sustainability challenges. Advances in molecular biology, protein engineering, and immobilization techniques now enable enzymatic properties to be tailored to meet the specific functional, nutritional, and sensory demands of the food industry. This Special Issue will highlight recent progress in enzyme discovery, modification, and integration into food processes. Studies addressing innovative engineering methods, structure–function relationships, and practical applications of enzymes for emerging food technologies are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
