

## Special Issue

# Advances in Encapsulation and Controlled Release of Food Bioactive Components

### Message from the Guest Editor

Bioactive components have great importance in food and pharmaceutical products because of their health benefits. However, their susceptibility to environmental conditions makes them difficult to be used in food, cosmetic and pharmaceutical products in their pure form without encapsulation. Encapsulation is a process which helps to improve the stability and controlled release properties of bioactive components. Encapsulation technology describes enclosing active agents within a protective wall material at the micro/nano scale. The enclosed active agents are protected from undesirable interactions, thereby enhancing stability during processing or storage and increasing bioavailability. In encapsulation technology, different methods under varying conditions are employed to improve the encapsulation efficiency and retention of encapsulated bioactive compounds. This Special Issue aims to highlight advances in encapsulation technology employed to form the capsules, and in controlled release systems to release food bioactive components from the capsules. Therefore, studies that involve innovative approaches to encapsulation and controlled release systems are warmly welcomed.

### Guest Editor

Prof. Dr. Fahrettin Göçüç

Food Engineering Department, Engineering Faculty, University of Gaziantep, Gaziantep 27410, Turkey

### Deadline for manuscript submissions

closed (20 October 2023)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
