Food Protein: Structure, Digestion, and Functional Properties

Message from the Guest Editors

Functional properties in food protein are affected by physical and chemical properties during processing, storage, preparation, and consumption. The denaturation or aggregation of proteins under environmental conditions greatly affects their applications in the food industry. Therefore, one of the major emerging technologies is modification of protein structure to obtain tunable functional properties with greater structural stability. In recent years, many fundamental and applied research advances have been achieved to explore innovative applications in food proteins, including synthesis of protein fibers, preparation of protein-based emulsions, discovery of self-assembly behaviors and interfacial properties, new understanding on protein digestion and biological fate, as well as the production of artificial meat from plant proteins. This Special Issue aims to collect recent fundamental and applied research advances related to the abovementioned topics, thus, contributing to the development of food protein theory and new technology.

Guest Editors

Prof. Dr. Gang Liu
Prof. Dr. Yue Zhang
Dr. Weiping Jin

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
