Food Loss and Waste in Food Supply Chains

Message from the Guest Editors

Food loss and waste (FLW) is a critical global challenge, impacting food security, resource efficiency, environmental sustainability, and economies. Edible products are lost throughout the supply chain, from production to consumption. This inefficiency leads to major greenhouse gas emissions, resource misuse, and economic costs. As sustainability and climate action gain urgency, reducing FLW has become a priority. Studies highlight strategies to prevent and reduce FLW at each stage, and valorize unavoidable waste. Integrating technology, supply chain improvements, behavior change, and policy can enhance resource use and reduce environmental impacts. Growing research emphasizes global importance. Life cycle assessment, digital tools, and circular economy models offer new ways to mitigate FLW and recover value. This Special Issue seeks to bring together interdisciplinary insights on the drivers, impacts, and solutions to FLW, contributing to scientific advancement and the achievement of sustainable development goals.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
