Sixty Years of International Food Standards: Serving the Transformation of Food Control Systems Globally

Message from the Guest Editor

For close to 60 years, the Codex Alimentarius Commission (Codex), the international food standard setting body, has developed and adopted science- and evidence-based food safety and quality standards and guidelines to protect the health of consumers and ensure fair practices in the international food trade. Codex has contributed to bringing together 189 members: 188 countries and 1 member organisation, the European Union, with the commitment to work together, following the same principles of risk analysis, relying on documented evidence to develop food standards for the world and embracing the same values of collaboration, inclusiveness and transparency. This commemorative Special Issue will contribute to the celebration of the 60th anniversary of Codex and will discuss the current challenges and priorities faced by various regions around the world in relation to food regulatory development and the needs of evolving food systems regionally and globally. This Special Issue will also focus on some of the efforts that are underway in food regulatory convergence guided by Codex, such as those underway in Africa, with the aim to effectively contribute to human and economic development.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1
(Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
