

Special Issue

Functional Foods and Their Benefits for Health Regulation

Message from the Guest Editors

This Special Issue aims to delve into the intricate relationship between bioactive compounds (especially polyphenols and dietary fiber), their new analogues and role in chronic diseases, such as type 2 diabetes mellitus (T2DM), hypertension, and hyperlipidemia. The focus is on the significant role of functional foods in health regulation.

I invite scholars and researchers to contribute original papers that explore the diverse aspects of natural bioactive compounds (especially but not only polyphenols and dietary fiber) or their analogues in the context of T2DM, hypertension, and hyperlipidemia. The emphasis is on shedding light on their mechanisms of action from the perspectives of gut microbiota, digestive enzymes (α-amylase, α-glucosidase, pancreatic lipase), intestinal absorption, and transportation, as well as other relevant factors.

Additionally, contributors are also encouraged to investigate the interaction between these compounds and other nutrients, offering valuable insights that can inform dietary interventions and lifestyle modifications.

Guest Editors

Dr. Fuhua Li

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
