Analytical Chemical Methods Combined with Multivariate Analysis for Food Authenticity Assessment and Quality Evaluation

Message from the Collection Editors

Quality and authenticity of food are essential for food industry and consumers, as well as are important for trade relationships in a global market. Moreover, food frauds related to mislabeling or adulteration are of major concern for both regulatory authorities and industry due to economic and public health implications. All these aspects highlight why it is necessary to have approaches for identifying adulterations or mislabeling, and more generally to assess authenticity and quality of food. Analytical methods in combination with multivariate analysis have been successfully used for these purposes. Despite the large number of studies that have been published during the past years, real applications have remained limited due to a lack of validation and international harmonization of the developed methods. This Special Issue will publish recent researches based on the combination of analytical chemical methods with multivariate analysis for food authenticity assessment and quality evaluation, with an emphasis on method development and validation. Both review and original research articles are welcome.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
