

## Special Issue

# Advanced Technology to Improve Food Protein Functionality

### Message from the Guest Editors

Dear colleagues,

This Special Issue focuses on protein structure, protein denaturation, the inter-relationship between the structure and functional properties of protein, protein modification, and processing-induced physical, chemical, and nutritional changes in proteins. Methods for the extraction, purification, and characterization of some intriguing proteins are also encouraged, as is the advancement of cutting-edge technology to enhance the functionality of food proteins.

This Special Issue also discusses the significance of protein modification in the functional properties of foods, estimation analytical methods for the structure and functional features of proteins, and the impact of various process parameters on the molecular structures in food proteins. Using state-of-the-art technology, functional protein components are produced, and their quality, safety, and assessment of biological activities as well as biochemical mechanisms are all covered. The use of functional food protein components in food products and knowledge of functional food protein claims to control human consumption are also encouraged.

---

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
