Advances in Functional Egg and Egg Products Processing: Protein Modification for Enhanced Nutrition and Applications

Message from the Guest Editors

This Special Issue explores the latest developments in egg protein processing, highlighting innovative techniques, applications, and the enhanced nutritional benefits achieved through protein modification.

Therefore, we sincerely invite authors to submit original research and review articles that explore the nutrition, functional applications, and innovative processing technologies of egg proteins. We believe this issue will provide valuable insights and inspire new research for the use of egg-derived proteins in functional foods with broader health benefits.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.
