Bioactive (Poly)phenols in Food: Current Topics and Advances

Message from the Guest Editors

(Poly)phenolic compounds are gaining increasing interest in the field of food sciences and technologies, due to their health benefits, nutritional value, and to the potentialities for their technological exploitation in sustainable food chains; several food sources, including fruit, vegetables, crops, beverages, wine, as well as new unexploited and under-utilized sources (i.e. algae) naturally contains valuable amounts of (poly)phenolic compounds. Moreover, scientific studies focused on the usage of food-grade polyphenolic extracts as food additives / technological aids and on their recovery from food wastes showed a remarkable impulse in the last few decades, and the relevance of non-extractable (poly)phenols (NEPP) or macromolecular antioxidants as food bioactive compounds is also of great interest. This Special Issue aims at collecting current knowledge and most recent advances in the field of food polyphenolics, envisaging both critical reviews and research articles which investigate their role on food composition, food technology, nutraceutical, and sustainable food chains.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
