

Special Issue

Research on Toxic Substances in Food of Marine Origin

Message from the Guest Editor

This Special Issue aims to highlight the most recent reports on all aspects of marine toxins. Experts from the fields of aquatic sciences, food microbiology, agronomy, toxicology, analytical chemistry, and molecular biology are invited to contribute their findings in the form of full research articles, short communications, or focused reviews to increase existing knowledge on the wide-ranging and complex topic of marine toxins.

It is essential to show the state of the art and directions for growth with respect to innovative strategies aiming to prevent toxic substances contamination at each stage of aquatic production. For example, some new marine toxin analysis technologies and the potential risk of exposure to chemical contaminants contained in marine foods should be taken into consideration in the assessment of the health quality of these foods. Other topics of interest include the use of novel methods for the detection of some toxic substances in food of marine origin, as well as the use of natural bioactive compounds to increase food safety during all stages of production, from the field to consumers.

Guest Editor

Dr. Ningbo Liao

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
