Ensuring Food Safety: Hazards and Control of Residues and Contaminants in Food

Message from the Guest Editors

The presence of residues and contaminants in food poses significant risks to public health. Key hazards include chemical residues such as heavy metals, pesticides, drugs and plasticizers, as well as biological agents like natural toxins (plant toxins, mycotoxins and phycotoxins). These contaminants can lead to acute health effects to chronic diseases, making their control essential for food safety. Understanding cross-contamination and the co-occurrence of these contaminants is essential for assessing emerging risks. To address this issue, there is a need for developing novel analytical methods for their determination as food samples. Less-investigated matrices, like nutraceuticals and dietary supplements, are particularly important given their rising consumption. Moreover, trends in Green Analytical Chemistry encourage the use of sustainable methodologies. We invite researchers to share their innovative findings in this Special Issue to deepen knowledge related to food safety.

Guest Editors

Dr. Laura Carbonell-Rozas

Department of Chemistry and Physics, Research Centre for Mediterranean Intensive Agrosystems and Agrifood Biotechnology (CIAIMBITAL), Agrifood Campus of International Excellence (ceiA3), University of Almería, E-04120 Almería, Spain

Prof. Dr. Monsalud Del Olmo-Iruela

Department of Analytical Chemistry, Faculty of Sciences, University of Granada, Av. Fuente Nueva s/n, 18071 Granada, Spain

Deadline for manuscript submissions

15 December 2025

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
