

Special Issue

Research on Sustainable Food Packaging Technology

Message from the Guest Editors

Food industries have a great global economic impact, producing large quantities and varieties of products, but often with recurring food safety problems due to normal deterioration or attack of the environment (microorganisms, insects, traces of chemicals). The security and reduction of postharvest losses (fruits and vegetables) and degradation along supply channels becomes a key challenge for society and the economy. In this regard, this Special Issue seeks to disseminate to scientific society and industrial stakeholders new innovative technologies in the development of food packaging that ensure the durability of food, and even offer smart packaging with active properties that improve the appearance and presentation of food. Thus, the application of innovative technologies in the production of sustainable food packaging, the use of bio-based materials of renewable origin or with improved properties, or the design of new additives used during food storage are common topics considered in this Special Issue, remaining open to other lines of research associated with improving the durability and economic/logistics of the food supply chain.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
