Discovery, Functions and Applications of Food-Derived Bioactive Peptides

Message from the Guest Editor

With the increasing interest in food components, bioactive peptides have garnered significant attention since these peptides, derived from various food sources, exhibit diverse physiological functions including antioxidant, antimicrobial, blood pressure-lowering, and immunomodulatory activities, etc. This Special Issue focuses on (i) the discovery methods and processes of these peptides, involving wet-experiments and dry-experiments; (ii) their functions and mechanisms of action in health and disease management; and (iii) their potential applications in the food industry and medicine. Our aim is to enhance our understanding of these peptides and explore their practical utilization across various domains. Readers can expect a comprehensive overview of the latest research advancements in this field, paving the way for future developments and applications of food-derived bioactive peptides.

Guest Editor

Prof. Dr. Guizhao Liang
Bioengineering College, Chongqing University, Chongqing, China

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
