

## Special Issue

# Emerging Technologies for Determination of Contamination in Foods

### Message from the Guest Editors

Food may be contaminated with environmental and processing contaminants, including contaminants migrated from food packaging. Public concern about contaminants (i.e., veterinary drugs, pesticides, polycyclic aromatic hydrocarbons, mycotoxins, etc.) in food samples has increased dramatically in the last two decades. In order to protect the health and safety of consumers, analytical methods that could provide fast and reliable answers without compromising accuracy and precision are then required. In this regards, this Special Issue aims to cover the advances in sample preparation and separation technologies for fast and reliable characterization and quantitation of traditional and emerging contaminants in food samples. The role of innovative sample treatment techniques (i.e., microwave-assisted extraction, pressurized liquid extraction, membrane extraction, micro-extraction techniques, QuEChERS, molecularly imprinted polymers, etc.), liquid and gas chromatographic approaches (GC, UHPLC, GCxGC, HPLC-GC, HPLCxGC, etc.) as well as the role of high-resolution mass spectrometry in food analysis will be addressed. Both original research articles and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
