

## Special Issue

# The Generation and Control of Harmful Products in Food Processing Volume II

### Message from the Guest Editors

In order to obtain satisfactory quality, food materials are usually processed. However, along with improving the food quality, harmful products may also be generated, such as heterocyclic amines, advanced glycation end products, acrylamide, ethyl carbamate, methylimidazole, etc. Recently, studies in this area have become significantly more popular, particularly studies addressing the detection methods employed, the generation of these harmful products, the existence of these products in different food systems, and the inhibition of these products using various techniques. Based on the increasing concern regarding the safety of food processing procedures, it is of great value to report the latest research on the detection methods, generation and control of harmful products. We invite the submission of full research papers, review articles and communications addressing the related topics.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
