

## Special Issue

# Sustainable Agriculture for Food and Nutrition Security

### Message from the Guest Editors

The fundamental purpose of agriculture is to produce nutritious food for people. This production needs to be carried out in a way that it does not permanently degrade the environment or result in the loss of habitats for other organisms. These are challenging objectives. As such, the aim of this Special Issue is to examine what 'sustainable agriculture' may look like in different parts of the world as the human population continues to increase, climate changes and becomes more variable, and the means to reduce greenhouse gas emissions are implemented. Different views and contributions about how sustainable production systems might emerge are welcome and could include aspects of regenerative, low-input, climate-smart, net-zero, intensified, mixed or conservation production systems. Articles that include data about the nutritional value of the crops and animals to humans in addition to details about production methods and yields are particularly encouraged. We are also keen to explore how sustainable production systems can lead to a more efficient processing of products and thereby contribute to more sustainable food systems.

### Guest Editors

Prof. Dr. Peter J. Gregory

School of Agriculture, Policy & Development, University of Reading,  
Earley Gate, Reading RG6 6AD, UK

Dr. Greg Rebetzke

Commonwealth Scientific and Industrial Research Organization,  
Melbourne, Australia

### Deadline for manuscript submissions

15 August 2025

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
